Anantapur, Andhra Pradesh | +91 9492531671 | dineshkumarpathipati@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

B.Tech Data Science student (CGPA 8.52/10) who has deployed AWS-based platforms (Lambda, API Gateway, RDS, Cognito) in production for 5,000+ users, and published research on MobileNetV2-based crop disease detection (3rd Place, SRDC Vidhyanidhi). Strong in DSA and applied ML, seeking ML Engineer, Data Scientist, or MLOps Engineer roles.

EDUCATION

Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal, Andhra Pradesh

B.Tech – Data Science | CGPA: 8.52 / 10

2023 – 2027

Coursework: Data Structures & Algorithms, OOP (Java), DBMS, Machine Learning, Operating Systems, Computer Networks, Software Engineering

TECHNICAL SKILLS

Languages: Java, Python, C, SQL

Core CS: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks, SDLC

ML / DL: CNN, ANN, MobileNetV2, Transfer Learning, Scikit-learn, TensorFlow, Keras

Web & Tools: Flask, REST APIs, MongoDB, MySQL, Git, GitHub, Postman, VS Code

Cloud: AWS Lambda, API Gateway, RDS (PostgreSQL) & RDS Proxy, S3, CloudFront, Cognito, VPC, IAM

PROJECTS

Intelligent Crop Disease Identification System | *Python, Flask, TensorFlow, MongoDB, REST API* [GitHub](#) [Live Demo](#)

- Built and deployed a full-stack AI web application using MobileNetV2 (transfer learning) to classify crop diseases across 10+ categories with ~90% accuracy, cutting manual diagnosis time for farmers.
- Integrated the OpenWeatherMap API to power real-time, weather-based disease risk analysis and auto-generate spraying schedules, improving actionability of predictions.
- Designed a multilingual (English & Telugu) advisory module backed by MongoDB for persistent, scalable data retrieval, widening accessibility for regional-language users.

Smart Queue – Virtual Queue Management System | *Python, Flask, MongoDB, REST API* [GitHub](#) [Live Demo](#)

- Architected and shipped a real-time virtual queue management system supporting 50+ concurrent users, with dynamic wait-time estimation and live tracking via REST APIs.
- Designed and implemented priority-based scheduling algorithms for customer allocation, reducing average wait time through intelligent queue optimization.

RGM CET Eduflow – Campus-Wide Student Platform | *AWS Lambda, API Gateway, RDS, S3, CloudFront, Cognito* [Live Demo](#)

- Architected and deployed a serverless full-stack platform on AWS (Lambda, API Gateway, RDS PostgreSQL with RDS Proxy, S3, CloudFront, Cognito), now used campus-wide by ~5,000 students and 30-40 faculty members.
- Designed a secure VPC architecture with Prisma ORM for scalable database access, and owned end-to-end cloud deployment - turning a class project into a production system adopted institution-wide.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified AI Practitioner – Amazon Web Services (Issued Apr 2026, Valid through Apr 2029).
- Associate Data Analyst – Certified by DataCamp (Mar 2025).
- Certified in AWS Academy Cloud Foundations and AWS Academy Cloud Architecting – Amazon Web Services.

PUBLICATIONS

“Real-Time Crop Disease Avoidance and Weather-Constrained Farm Scheduling Using MobileNetV2-Based Vision and Multilingual Voice Advisory”

- Published in IJMRT Journal; presented at the Students International Conference 2026, Student Research & Development Cell (SRDC) Vidhyanidhi, JAIN University, Bengaluru (Mar 2026); awarded 3rd Place.

HACKATHONS & COMPETITIONS

- 3rd Place – PromptWars (Hack2Skill) for "Reel Intelligence," scoring 92.78/100 among 600+ participating students.
- Winner (1st Place) – 3 branch-level hackathons organized by technical clubs at Rajeev Gandhi Memorial College of Engineering and Technology.
